VCDC – Diagnostic Centre

Diagnostic software for easy valve system test and maintenance.

Val Controls Diagnostic Centre for evaluating partial stroke, full stroke and solenoid test.

By using Val Controls Diagnostic Centre it is possible to:
- See valve signatures
- Compare valve signatures
- Live control and monitoring of the valve system
- Generate test reports

Licence and updates
For workshop test, VCDC can be downloaded for free at valcontrols.com.

End users need to buy a licence for VCDC. The licence includes the following:
- Licence for VCDC for 100 tags installed on one system (if more tags are needed, please contact Val Controls)
- Free secondary licence for extra service PC
- Support by phone and e-mail for 1 year
- Free upgrade 1 year

Product compatibility
VCDC can be used with the following products:

- IVC24
- IDP24
- IDC24

With the following communication types:
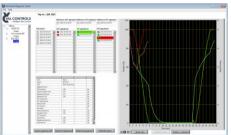

- Certified DTM for HART communication
- Modbus

| Part number	Name	Description
121610	VCDC HART - Workshop	SW licence - 1 tag - FREE
121611	VCDC HART - End user	SW licence – 100 tags
121619	VCDC HART - End user	1 year renewal
121620	VCDC Modbus/BT - Workshop	SW licence - 1 tag - FREE
121621	VCDC Modbus/BT - End user	SW licence - 100 tags
121629	VCDC Modbus/BT - End user	1 year renewal

Hardware and cables
All hardware and cables for connection between the Val Controls unit and VCDC and extra software for running the VCDC on the hardware is not included.

Val Controls can supply complete systems and we help on start up. For more information, please contact Val Controls.
